SEMI-PROFESSIONAL FARMER BELT/GEAR-DRIVEN ROTARY TILLER

The new 204 rotary tiller is designed to meet the needs of farmers and open space maintenance professionals. Tillage of virgin land and soil preparation for sowing are handled with ease thanks to the powerful engine and exceptional performance of this machine.

The two forward speed settings plus a reverse gear mean that even less expert users can enjoy perfect manoeuvrability and the maximum comfort when during tillage operations.

The carefully executed design process behind this machine means that working conditions are always absolutely safe for the user.

Main features:

- Petrol engine with recoil starting.
- Belt drive primary transmission.
- High strength, low-maintenance oil-bath gear drive secondary transmission.
- Extreme versatility thanks to the 3-speed gearbox (2 forward + 1 reverse).
- The reverse gear allows easy disengagement from even the most difficult operating situations.
- The handlebars are height adjustable to adapt the machine's ergonomics to match the user's posture.
- 85 cm rotor with lateral safety discs (can be reduced to 65 cm).
- Rugged 4.2 mm thick steel blades.
- Adjustable control bar for working depth control.
