ROTARY TILLER FOR HOME USE

The new 195 rotary tiller is designed for home users looking for high-end performance. This type of machine is perfect for tilling and weeding a small household vegetable plot or allotment. The powerful engine and rugged blades allow the machine to handle even the most difficult conditions with ease.

The presence of a reverse gear makes for optimal manoeuvrability for even inexperienced users with the maximum comfort during tillage operations. A carefully executed design process means that working conditions are absolutely safe, even for users who are unfamiliar with rotary tillers.

Main features:

- Petrol engine with recoil starting.
- Belt drive primary and secondary transmission. Inspectable secondary transmission.
- The reverse gear allows easy disengagement from even the most difficult operating situations.
- The handlebars are adjustable laterally and in height to adapt the machine's ergonomics to match the user's posture.
- 80 cm rotor with lateral safety discs (can be reduced to 60 cm).
- Rugged 4.2 mm thick steel blades.
- Adjustable control bar for working depth control.
- Front wheel for easy transportation of the machine.
